DISCLAIMER

NOTICE TO RECIPIENTS

THIS DOCUMENT IS FOR INFORMATIONAL PURPOSES ONLY AND SHOULD NOT BE RELIED UPON AS INVESTMENT ADVICE. This document has been prepared by ADAR1 Capital Management, LLC ("ADAR1", "the Firm") and is not intended to be (and may not be relied on in any manner as) legal, tax, investment, accounting or other advice or as an offer to sell or a solicitation of an offer to buy any securities of any investment product or any investment advisory service. The information contained in this document is superseded by, and is qualified in its entirety by, such offering materials. This document may contain proprietary, trade-secret, confidential and commercially sensitive information. U.S. federal securities laws prohibit you and your organization from trading in any public security or making investment decisions about any public security on the basis of information included in these materials.

THIS DOCUMENT IS NOT A RECOMMENDATION FOR ANY SECURITY OR INVESTMENT. References to any portfolio investment are intended to illustrate the application of ADAR1's investment process only and should not be used as the basis for making any decision about purchasing, holding or selling any securities. Nothing herein should be interpreted or used in any manner as investment advice. The information provided about these portfolio investments is intended to be illustrative and it is not intended to be used as an indication of the current or future performance of ADAR1's portfolio investments.

An investment in a Fund entails a high degree of risk, including the risk of loss. There is no assurance that a Fund's investment objective will be achieved or that investors will receive a return on their capital. Investors must read and understand all the risks described in a Fund's final confidential private placement memorandum and/or the related subscription documents before making a commitment. The recipient also must consult its own legal, accounting and tax advisors as to the legal, business, tax and related matters concerning the information contained in this document to make an independent determination and consequences of a potential investment in a Fund, including US federal, state, local and non-US tax consequences.

PAST PERFORMANCE IS NOT INDICATIVE OF FUTURE RESULTS OR A GUARANTEE OF FUTURE RETURNS. The performance of any portfolio investments discussed in this document is not necessarily indicative of future performance, and you should not assume that investments in the future will be profitable or will equal the performance of past portfolio investments. Investors should consider the content of this document in conjunction with investment fund quarterly reports, financial statements and other disclosures regarding the valuations and performance of the specific investments discussed herein.

DO NOT RELY ON ANY OPINIONS, PREDICTIONS, PROJECTIONS OR FORWARD-LOOKING STATEMENTS CONTAINED HEREIN. Certain information contained in this document constitutes "forward-looking statements" that are inherently unreliable and actual events or results may differ materially from those reflected or contemplated herein. ADAR1 does not make any assurance as to the accuracy of those predictions or forward-looking statements. ADAR1 expressly disclaims any obligation or undertaking to update or revise any such forward-looking statements. The views and opinions expressed herein are those of ADAR1 as of the date hereof and are subject to change based on prevailing market and economic conditions and will not be updated or supplemented.

EXTERNAL SOURCES. The data points and other information regarding the companies discussed herein are from research sources and tools believed to be reliable, including public company filings. Although ADAR1 believes the information from such sources to be reliable, ADAR1 makes no representation as to its accuracy or completeness.

DESCRIPTION OF INDICES. The Standard & Poor's 500 Stock Index (S&P 500) is an unmanaged, market capitalization-weighted index of 500 widely held U.S. stocks that is recognized by investors to be generally representative of the stock market in general. The SPDR S&P Biotech ETF (XBI) seeks to track the performance of the S&P Biotechnology Select Industry Index, which represents the biotechnology segment of the S&P Total Market Index. Index information is provided to represent the investment environment existing for the time periods shown. Unless otherwise noted, index returns reflect the reinvestment of income, dividends and capital gains, if any, but do not reflect fees, brokerage commissions or other expenses of investing. The returns of each index do not reflect the actual cost of investing in the instruments that comprise it. No representation is made that the Fund will replicate or exceed the performance of any of the indices.

DESCRIPTION OF ADAR1 NET PERFORMANCE. ADAR1 net performance reflects the deduction of all fees and expenses for an investor who has been invested in ADAR1 Partners, LP ("the Fund") since inception (March 5, 2019) under the terms and conditions as stated in this document and is net of 1.5% per annum management fee and 25% performance allocation (subject to a loss carryforward provision) through December 31, 2022. Beginning January 1, 2023, performance is net of 1.5% per annum management fee and 20% performance allocation (subject to a loss carryforward provision). The returns are unaudited and reflect the reinvestment of all dividends, interest, and capital gains net of expenses. An individual investor's return will vary due to differing fee/allocation levels and the timing of contributions/withdrawals.

THIS DOCUMENT IS NOT INTENDED FOR GENERAL DISTRIBUTION AND IT MAY NOT BE COPIED, QUOTED OR REFERENCED WITHOUT ADAR1's PRIOR WRITTEN CONSENT.

EXECUTIVE SUMMARY

ADAR1 is a Healthcare-focused long/short investment manager, founded in March 2019 by Daniel Schneeberger. Rooted in a partnership-first culture, our goal is to achieve attractive long-term returns for our LPs through strong alpha generation.

DYNAMIC STRATEGY, FLEXIBLE ACROSS HEALTHCARE

- Open mandate with the freedom to invest opportunistically across a wide range of Healthcare/Biopharma securities (market caps, stages)
- Deep scientific analysis of drug development programs
- Risk management rooted in conservative sizing and aggressive loss scenarios
- Predominantly U.S.-focused

DIFFERENTIATED LEADERSHIP AND BIOTECH VIEWS

- Led by Founder and CIO Daniel Schneeberger, MD, MBA
- Strong alignment and business stability with 19% internal capital¹
- Brings a valuable combination of scientific, clinical, business and investment experience, accumulated over 25 years

STRONG UNCORRELATED RETURNS, LOW VOLATILITY^{1,2}

- Since inception, the Fund has compounded at 34.8% (net), or ~2.1x the S&P 500 Total Return Index, with ~10% less volatility
- Since Inception, the Fund has outperformed the Biotech index (XBI) by 28.9% annualized
- Historically, the Fund has realized betas between 0 to 0.5 against the S&P 500 Index and SPDR S&P Biotech ETF ("XBI")

¹Affiliates capital balances in ADAR1 Partners, LP as of May 31, 2026. Performance data as of May 31, 2026, and reflects performance of a representative investor's main capital account balance (excludes side pockets). ²For illustrative purposes only. There can be no assurances that any trends depicted or described will continue. Past performance is not indicative of future results or a guarantee of future returns. Refer to slide titled "Disclaimer" for descriptions of ADAR1 net performance and indices.

NAVIGATING MARKET DOWNTURN

Downside protection, upside participation

Since March of 2024, ADAR1 (with ~2/3 of its portfolio in pre-commercial names) effectively protected capital during a significant pull-back for pre-commercial biotech companies (down at the lows almost 60% from peak valuations 3/1/2024)

As the market recovered, we have been able to participate in the upswing and shown outperformance of our relevant market indexes including the SPY US Equity Index

We are proud of the successful stress test and believe this continues to show we have a successful approach that can evolve with the markets

Normalized % return (3/1/2024 – 9/30/2025)

Note: For illustrative purposes only. There can be no assurances that any trends depicted or described will continue. Past performance is not indicative of future results or a guarantee of future returns. Refer to slide titled "Disclaimers" for descriptions of ADAR1 net performance and indices. ¹The MS Non-Commercial Biotech Index is a custom index created and managed by Morgan Stanley and consists of 160 constituents that Morgan Stanley defines as biotech companies with no approved products or product sales. This index is optimized for liquidity and composed to be as close to equal weight as possible. Maximum and minimum weights are set at 1.5% and 0.1% at the time of rebalancing. The returns of the index do not reflect the actual cost of investing in the instruments that comprise it, and do not account for financing and execution costs.

THE ADAR1 DIFFERENCE

Alpha-generating biotech insights

In a landscape of persistent macro uncertainty, portfolios benefit most from:

Liquid, uncorrelated strategies

High alpha contribution

ADAR1'S DIFFERENTIATED APPROACH SEEKS TO:

- **Align** fully with investors' interests (GP/family assets are 20% of fund¹)
- **Maintain** a fund size that can capture alpha across all market caps and development stages
- **Perform** extensive diligence, synthesizing advanced scientific knowledge
- **Deliver** attractive returns, lower market correlations and less leverage vs. competitors

¹Affiliates capital balances in ADAR1 Partners, LP as of May 31, 2026.

INSPIRED BY EXTRAORDINARY ADAPTABILITY

OUR FIRM IS NAMED AFTER AN ENZYME

that allows cephalopods (octopus, cuttlefish and squid) to edit their RNA, while keeping their DNA intact.

ADAR1 is the key to their intelligence and ability to adapt to different environments.

INSPIRED BY CEPHALOPODS, WE AIM TO:

- Adapt to changing market environments to deliver all-weather returns
- Adhere to our insight-driven decision-making process across Healthcare/Biotech – a core part of our DNA

LED BY CIO DANIEL SCHNEEBERGER, MD, MBA

Deep medical, clinical, operations and investment experience accumulated over 25 years

PROFESSIONAL TIMELINE

Daniel has invested successfully through numerous market cycles, learned from extensive trial and error, developed winning pattern recognition, and refined a process true to his diverse background and risk-averse personality. His investment style has fueled ADAR1's strong returns while maintaining low volatility.

Note: References made to awards, industry affiliations, and professional associations are not an endorsement by any third party to invest with ADAR1, and are not indicative of future performance. Investors should not rely on awards/affiliations/associations for any purpose and should conduct their own review prior to investing.

EXTENSIVE AND VARIED HEALTHCARE/BIOTECH EXPERTISE

Combined exposure from various fields powers ability to form hypotheses/synthesize information

DIVERSIFIED SKILLSET

DEEPER UNDERSTANDING OF PATIENT NEEDS

As a physician, has a differentiated grasp of the concerns, behaviors, and expectations of prescribers and new drug adoption.

Broad understanding of medicine, science and unmet patient needs across different therapeutic areas.

WIDER, MORE DISCERNING LENS OF BIOTECH CHALLENGES

As a former dedicated short seller, performed deep scientific diligence to understand the probability of drug-development success.

Short selling instilled an ability to recognize subtle 'red flags' or weaknesses that separate winners from losers.

Differentiated
investment insights

Greater pattern
recognition critical to
investing success

VALUABLE INTERACTIONS WITH LARGE PHARMACEUTICALS

As a former strategy consultant for the pharmaceutical industry, analyzed commercial strategies, market access, and reimbursements, which help him to foresee challenges with drug launches.

Developed insights on how pharmaceutical companies review potential M&A targets.

FIRSTHAND OPERATIONAL EXPERIENCE

As former CEO of Anebulo Pharmaceuticals, had valuable exposure to IP strategy, manufacturing, clinical trial design and regulatory interactions behind developing a new drug.

Participated in 50+ early stage trials at Covance.

Experience facilitates more productive conversations with entrepreneurs.

PARTNERSHIP-FIRST FOCUS

Our mission is to consistently provide strong risk-adjusted returns across the Healthcare/Biotech space and to always remain good stewards of our clients' capital.

OUR CULTURAL VALUES MAKE OUR MISSION POSSIBLE:

GENERATE ATTRACTIVE LONG-TERM RETURNS

We aim to provide an all-weather strategy that delivers results independent of macroeconomic conditions.

OPTIMIZE RISK-ADJUSTED RETURNS, NOT AUM

Focus on growing at a reasonable pace to keep our Fund at a size that ensures optimal capital allocation across all global Biotech opportunities.

INTEGRATE RISK MANAGEMENT AT ALL LEVELS

As strong fiduciaries of our investors' capital, managing risk is central to our strategy.

SEEK KEY PATTERNS/TRENDS

We use our diversified experience to unlock valuable insights that drive the success/failure of life science investments.

USE A CONSTANT FEEDBACK LOOP

We continuously look to evaluate and optimize our processes in a dynamic macro environment.

CONSISTENT OUTPERFORMANCE WITH LOWER VOLATILITY THROUGH CHANGING ENVIRONMENTS

- **ADAR1 compounded at 34.8% (net)**, or ~2.1x the S&P 500 Total Return Index, with ~10% less volatility

- SPDR S&P Biotech ETF (XBI) generated single digit returns, while producing ~2.0x the volatility of ADAR1 over the same period

STRONG PERFORMANCE SINCE INCEPTION

(as of May 31, 2026)¹

CONSISTENT ALPHA GENERATION²

	ADAR1 (net)	SPY ('19-'22) XBI ('23-'26)	Assumed Theoretical Beta	ADAR1 Alpha (after fees)
2019	25.0%	17.6%	0	25.0%
2020	29.2%	18.4%	.50	20.0%
2021	41.7%	28.7%	.50	27.4%
2022	43.1%	-18.1%	.50	52.2%
2023	33.0%	7.6%	.50	29.2%
2024	12.8%	1.0%	.50	12.3%
2025	62.9%	35.9%	.50	45.0%
2026	8.9%	12.1%	.50	2.9%

¹Source(s): ADAR1, Bloomberg. Performance data as of May 31, 2026 and reflects performance of a representative investor's main capital account balance (excludes side pockets). ²Alpha (after fees) is calculated by multiplying the fund's assumed theoretical beta to the respective index each year by the return of the respective index, then subtracting this product from the fund's net return. Note: 2019 data covers March 5, 2019 (Fund inception) to December 31, 2019. For illustrative purposes only. There can be no assurances that any trends depicted or described will continue. Past performance is not indicative of future results or a guarantee of future returns. Refer to slide titled "Disclaimers" for descriptions of ADAR1 net performance and indices.

MONTHLY RETURNS

STRONG PERFORMANCE SINCE INCEPTION

(as of May 31, 2026)¹

Monthly returns show consistent performance through a nearly 7-year track record. This was achieved during a challenging bear market in biotech/healthcare and with low volatility of 15.5%. We continue to prioritize high returns with reasonable volatility and protected downside.

ADAR1	ITD
Cumulative Net Return	772.5%

INVESTMENT PHILOSOPHY

Striving for objectivity, unique viewpoints and strong diversification across Healthcare Sector

Focus on idiosyncratic sources of return

Biopharma is a prime hunting ground for alpha due to its high volatility and dispersion.

We are aiming to find investments that are going to experience a significant change in valuation if we are right on the science.

Remain aware of cross-correlations to manage risks and drawdowns

Our strategy does not require excess leverage to achieve target returns.

We build a portfolio diversified across market caps and maturity stages to balance factor exposures (small caps more correlated with unprofitable growth, large caps more correlated with defensive sectors).

Our trades and investments target a large number of uncorrelated events that are less susceptible to market swings.

Generate our own anti-consensus viewpoints

We are strategically located away from Wall Street, away from the 'market noise' and consensus that drive traditional investors.

We use diversified experience – at the intersection of medicine, science, financial – to isolate patterns/trends that other market participants often miss.

We strive for objectivity and patience to uncover opportunities others may have overlooked.

Note: There can be no guarantee that the Fund will be able to implement its investment strategy or achieve its investment objectives. Diversification does not eliminate the risk of loss.

CAPITAL ALLOCATION MODEL

Seeking alpha across durations, market caps and business stages

DIVERSIFIED ACROSS MARKET CAPS

Small cap	Mid cap	Large cap
Our diversified approach seeks to turn the high volatility of Biotech small caps into an advantage since we can re-balance during dislocations to the upside/downside	We also invest in more mature mid- and large-cap companies, which helps us reduce the volatility of the Biotech small-cap book The diligence process is fundamentally the same in Biopharma, regardless of size	

CAPTURING OPPORTUNITIES ALONG TIME HORIZONS

Note: There can be no guarantee that the Fund will be able to implement its investment strategy or achieve its investment objectives. Asset allocation is subject to change and does not guarantee a profit or protection from losses. Diversification does not eliminate the risk of loss.

PROCESS FOR EVENT-DRIVEN INVESTMENTS

Focused on differentiated probabilities of technical or regulatory success

PROCESS FOR FUNDAMENTAL LONG/SHORT INVESTMENTS

Focused on asymmetric opportunities with intermediate time horizons

ROBUST RISK MANAGEMENT FRAMEWORK

Managing risk at both the portfolio and position levels

Portfolio-level measures

Low gross leverage

- Target gross exposure of <140% (was 148% as of May 31)
- Our target universe is volatile enough to generate attractive returns without excessive leverage

Limited net exposure

Use single name shorts and index hedges to achieve net exposure we feel comfortable with, typically in the 40-60% range

Diversification by investing in promising drugs and technologies across the market-cap spectrum and maturity stages

Awareness of cross-correlations to manage risks and drawdowns; our trades target a large number of uncorrelated events that are less susceptible to swings

Position-level measures

Conservative position sizing aimed to keep single-name losses under aggressive scenarios below 350 basis points

- we assume any or all scenarios could transpire with drugs still under development by small-cap firms, thus we would typically size pre-commercial single drug longs no more than 4.5%

Bias towards a margin of safety among small-cap names, which are more susceptible to market swings

- e.g., low embedded expectations and sufficient funding to navigate volatility/a difficult funding environment

Structure trades by overlaying with option strategies with the goal of reducing tail risk

- e.g., out-of-the-money calls to hedge event-driven shorts

Note: There can be no guarantee that the Fund will be able to implement its investment strategy or achieve its investment objectives. Diversification does not eliminate the risk of loss.

FUND TERMS AND SERVICE PROVIDERS

APPENDIX

STREAMLINED AND NIMBLE TEAM

We are focused on building a nimble team with a breadth of experience to ensure we have the resources needed to expand our research capabilities and capitalize on a dynamic, diversified Healthcare opportunity set.

TEAM BIOGRAPHIES

DANIEL SCHNEEBERGER, MD (Founder, Portfolio Manager)

Prior to founding ADAR1, Daniel worked as a senior analyst at JFL Capital Management, a short-biased healthcare fund. He was responsible for generating trade ideas and specialized in the prediction of clinical trial readouts. Before becoming a full-time investor, Daniel was a consultant at McKinsey & Company, advising clients in the pharmaceutical, private equity, and agrochemical industries on R&D, portfolio decisions, and commercial strategies. Prior to McKinsey, Daniel was a resident in a Swiss tertiary care center, where he completed rotations in internal medicine, emergency medicine, and intensive care. Daniel received his medical diploma and a doctorate (MD) in rheumatology from the University of Basel. He was awarded the Elite-med award for graduating with the highest possible GPA. He also holds an MBA from Harvard Business School, where he was a Baker Scholar (Top 5%).

GREG GOULDER (Principal)

Prior to joining ADAR1, Greg managed a biotech-focused investment partnership and served as a research consultant for a biotech hedge fund, providing fundamental due diligence on clinical stage therapeutics companies. Greg began his career in the Investment Management Division of Goldman Sachs in San Francisco and also led a team of Solutions Consultants at Addepar, a fintech startup that provides portfolio management and risk analytics software. Greg received a BS in Finance and a BS in Economics from the W. P. Carey School of Business at Arizona State University, where he graduated summa cum laude from Barrett, the Honors College.

THOMAS MACIURA (Analyst)

Thomas joined the firm in January of 2021. Prior to joining ADAR1, Thomas operated Flying Dutchman Research, an equity research subscription outfit, where he published idiosyncratic long-biased research reports. Thomas graduated summa cum laude at Hofstra University, where he majored in management and minored in finance. In his time at Hofstra University, Thomas was the senior analyst of the Hofstra Student Managed Investment Fund, and co-CIO of the Hofstra Hedge Fund Association.

TEAM BIOGRAPHIES

MOHIT GUPTA, MD (Analyst)

Prior to joining ADAR1, Mohit worked on the small- to mid-cap biotechnology equity research team at Credit Suisse where he produced research reports on preclinical and clinical stage therapeutics companies. He received his MD from SUNY Downstate College of Medicine and was a member of the coordinated BA-MD program run jointly by Brooklyn College and SUNY Downstate College of Medicine. He also studied epidemiology and biostatistics at the Columbia University Mailman School of Public Health.

ROZ SWEENEY, PHD (Analyst)

Prior to ADAR1, Roz worked with Endurant Capital as a therapeutics analyst, specializing in generics, spec pharma and small/mid-cap biotech. From 2015-2020, Roz worked at PDL Biopharma, a healthcare alternative financing company, where she identified, led diligence, and completed over \$750M in financing deals on both the buy-side and sell-side. Earlier in her career, she worked as a biotech research associate with RBC and Credit Suisse. Roz has a PhD from University of Texas at Austin in molecular biology and a BS from University of Wisconsin at Madison in biochemistry.

CHRIS SEITZ (Principal)

Prior to ADAR1, Chris worked with Tekla Capital, where he was a Vice President and invested in public and private healthcare companies. Prior to Tekla, he was at the hedge fund Nantahala Capital and began his career in consulting and venture capital. He received his MBA from the healthcare management program at Wharton and a B.S. in Biology from Williams College with a focus on Pre-Medicine.

TEAM BIOGRAPHIES

STUART GRAHAM (COO)

Prior to ADAR1, Stuart worked as an Engagement Manager for McKinsey in the Life Sciences practices focused on R&D and clinical development strategy for biotech and pharmaceutical companies. Prior to McKinsey, he worked for ARCH Venture Partners focused on therapeutics and life science tools as well as Shimadzu Scientific Instruments. He received his MBA from the University of Chicago Booth School of Business and Masters in Chemistry from Furman University.

IAN O'SHEA (Controller)

Ian joined ADAR1 in January 2025, bringing over 10 years of experience in the finance industry, including portfolio operations, performance analytics and fund accounting and reporting. Prior to ADAR1, he served as senior analyst at Bristol Gate Capital Partners, a Toronto-based investment manager. Ian holds a bachelor's degree in business studies (finance) from Dublin City University.

STEPHEN SCIPIONE (Head of Operations)

Stephen joined ADAR1 in January 2021 and handles the firm's operations. Before ADAR1, he worked at Cambridge Associates as a senior associate advising endowments, foundations, and single-family offices on asset allocation, portfolio construction, risk management, and manager selection. Stephen graduated from the University of Virginia, receiving bachelor's degrees in economics and statistics.

RYAN ROMANOWSKI (Head of Trading)

Prior to joining ADAR1, Ryan worked at Avidity Partners Management, a healthcare sector hedge fund, as a research trader. He provided trade execution, managed sell-side relationships and augmented research coverage of events. Before that, Ryan was a healthcare sector position trader at several investment banks including Lehman Brothers, Barclays Capital and Citigroup. Ryan graduated summa cum laude from Boston College with a B.A. in History. He is earning his MBA, part-time, from the Dolan School of Business at Fairfield University.

DEEPER DIVE ON SOURCING

Following our extensive collection of names throughout drug-development stages

It's important to note that coverage of the Healthcare universe is different from other sectors, since the completion of drug development programs typically takes 6 to 9 years to play out (compared to other sectors like Consumer Staples with key milestones occurring more often).

Leveraging our vast institutional knowledge

Many of our current investments consist of names we've been tracking since 2016.

Given the long durations in drug development, the team can efficiently revisit and assess situations on a regular basis.

Tracking names

We rigorously assess the science behind programs and prioritize those with high-value catalysts. We will in turn revisit names (and competitors in the space) many times over the course of a drug's development lifecycle.

Longer-duration Book: Follow companies over a long period.

Shorter-duration Book: Follow a funnel of companies with catalysts/clinical trial readouts expected over next three months.

External sourcing tools

We also source opportunities:

- By engaging with our network of experts.
- Using databases or calendars of clinical trials aggregated by the sell side.
- Reviewing daily news, medical literature, scientific reports, clinical data, options market, short interest.

DEEPER DIVE INTO OUR RESEARCH PROCESS

Objectivity is part of our DNA

Our event-driven research process starts by determining the probability of an event transpiring. When assessing this probability, we seek to avoid common mistakes most traditional investors tend to make by sticking to a certain set of principles:

Data Availability Bias

Focused on data presented by companies and sell-side research, which typically present programs in the most favorable light.

What we do:

Review literature critically and weigh independent research higher than company or sell-side research.

Anchoring Bias

Tendency to become anchored to consensus theses from the broader market.

What we do:

Assume consensus is wrong and endeavor to poke holes in consensus assumptions.

Confirmation Bias

Holding strong/empathetic opinions of particular companies or drug development programs.

What we do:

Aim to be as dispassionate as possible and constantly seek conflicting information and other opinions.

Authority Bias

Use Key Opinion Leaders' (KOLs') views as part of diligence, which are often too optimistic and lead to consensus opinions.

What we do:

Use KOL calls for factual information only, which can be useful for clinical practice and prescribing patterns.

Halo Effect

Interact with management and become swayed by their enthusiasm, as they are usually skilled influencers (especially if the stock is their product).

What we do:

We spend little time at sell-side conferences and limit close interactions with management.

Overreliance on Clinical Data and Literature

Base analysis on prior clinical data, even if it was generated in small trials that are prone to bias.

What we do:

Approach scientific analysis with humility and skepticism – acknowledging our understanding of the human body is still limited.

RISK MANAGEMENT/CONSERVATIVE CAPITAL ALLOCATION IN ACTION

Shielding portfolio from significant drawdowns that challenged other long/short managers
