

FUND OBJECTIVES AND OVERVIEW

The Fund is a discretionary long/short fund that invests in 20-50 holdings across a diverse set of industries and geographies. The fund utilizes a value-based strategy with a special focus on asymmetrically investing for optimal risk-to-reward through exploiting inefficiencies in option pricing models based on a proprietary approach when these opportunities exist.

The Fund's objectives are to deliver absolute return on investment for partners by profiting from investments in closely evaluated companies, to limit risk through margin of safety and risk management strategies, to maximize risk-to-reward, and to employ fully transparent accounting practices.
